## PLANTS - TREES - SHRUBS BULBS - EVERGREENS - ROSES

### GIANT BLUEBERRIES

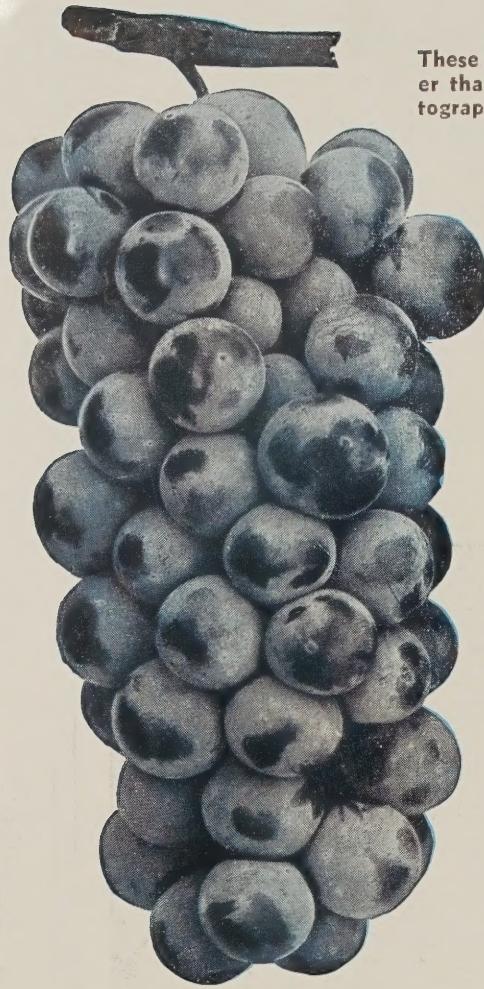

Just Think! Giant berries, many three-fourths of an inch across. Plump and juicy, sweet and full-flavored. Mild enough to be included in any diet. Fresh ripe berries require no sugar, canned berries very little. Ideal for freezing and very delicious for pies. Every bush is a heavy producer, four bushes in your yard will provide enough berries for pies throughout the season. See Page 16.

# WE ARE NURSERYMEN NOT DEALERS

When you order from us you are dealing direct with the growers. We are farmers, honest-to-goodness dirt farmers. We find it a pleasure to improve our methods as we go about our work satisfying our many customers.

It's our business to save you every cent we can on your nursery stock. It is also our business to send you the very best that can be grown. Another part of our business is to see that you are perfectly satisfied. We do not care how many plants you can get for a dollar, if they are not good, healthy, strong plants or if they do not reach you in good growing condition, you have not received your money's worth and you are not going to be satisfied, are you?

It is not the number of plants you get, but the quality of the plants that satisfies. Wouldn't you honestly rather have fewer choice plants for a dollar and be perfectly satisfied than to get more poor quality plants for a dollar and be bitterly disappointed? There's a mighty big difference between perfect satisfaction and bitter disappointment. When it comes to nursery stock, you can buy plants and trees at almost any price, but the stock that will produce the best results is the cheapest you can buy. It is always our aim to produce quality stock at the lowest price possible.

You are welcome to come and see us at any time, you may find us in our overalls pitching in right along with our help, but we will be more than glad to take off time to visit with you and show you around. We have no white collar men or desk engineers, everyone works at Zilke's. We live with our work, you will find our office and packing house on U. S. 12 highway, 3 miles north of Bridgman or 10 miles south of Benton Harbor, the world's largest fruit market.

## IT IS EASY TO ORDER BY MAIL

Dear Friend Customer:

As this is our only salesman, we again take pleasure in coming to you with this small catalog of big nursery bargains. We again offer you the highest quality hardy northern grown stock at wholesale prices. Through these annual catalogs and your business with us we feel acquainted with you. Whether your order is for \$1.00 or \$50.00 it will receive our personal attention and you will get a square deal.

You probably will receive a great number of catalogs this spring, listing many varieties of fruit of every description, but just remember that the Zilke Nursery is offering only the best of each class, the kinds that produce the most and best crops or fruits, that thrive and show the most natural disease resistance. Every plant, tree, shrub, and bulb that we offer is State inspected and free from disease.

Varieties are an important consideration in planning either your fruit garden or your ornamental planting. Some of the old varieties are still in first rank, but many must give up their places to the newer and finer kinds. We urge you to give the new Fairhaven Peach, Streamliner Everbearing Strawberry, Stanley Prune, Thornless Boysenberry, and the new Blueberry plants a fair trial. We feel sure you will be more than pleased with the results.

Here at the Zilke Nursery we utilize every known scientific method of selection, breeding, production and protection in shipment that will insure your getting perfect plants in perfect condition, with strong, fibrous roots for quick, sure growth.

It will be our constant study in the future, as it has been in the past, to give perfect satisfaction to our old customers as well as our new ones who entrust their order with us. Our success, we feel confident, depends wholly on the satisfaction we may be able to give our customer friends.

Yours very truly,

ZILKE BROS. NURSERY

## BARTLETT

### THE BEST SUMMER PEAR

There's hardly a person that doesn't know the Bartlett Pear and its qualities, as it is grown in, and is adaptable to all different climates, soils and situations. Fruit is large, golden yellow in color with a reddish blush on the sunny side. Flesh is tender and juicy, with a delicious musky aroma. Trees are vigorous, attain large size, bear young, live long, and barring frosts or freezes, they bear full crops year after year. Justly the leading commercial Pear—a leader among canning Pears. Fruit ripens early September. Prices above.

## KIEFFER

### FAVORITE WINTER STORAGE PEAR

One of the largest best known Pears. One of the best canning varieties and is possibly planted in more home orchards than any other variety. One of the easiest Pears to grow, less subject to blight than many varieties, strong grower, early and prolific bearer. Golden background, with a red blush. Recommended not only for the home orchard, but for the local market and roadside stands. Ripens in late October, heavy yielders. For Prices See Top of Page. Not available in the 7/16 to 9/16 size.

## NEW BOSC

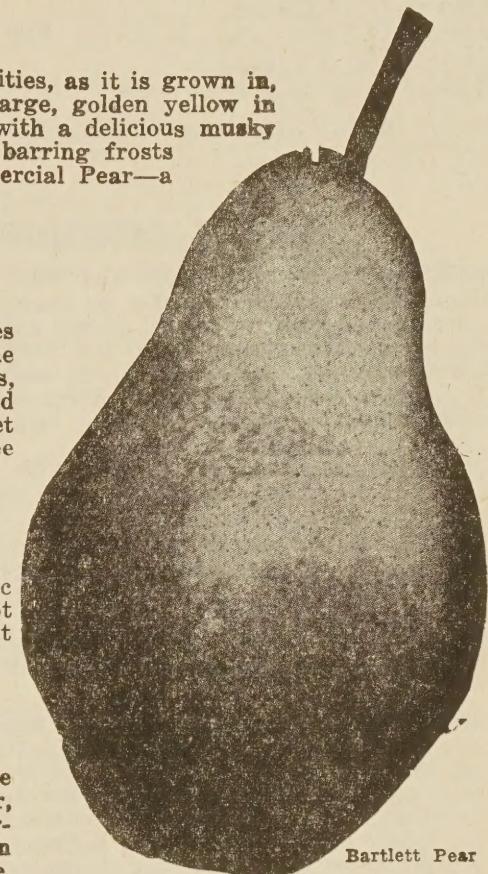

### THE LONG-NECK WINTER PEAR

A popular variety, and one of the best winter varieties. Fruit of artistic long-necked shape, golden russet color, with juicy, white flesh. Can be kept in storage for use during the holidays. Trees are rather small-growing, but heavy yielders. For Prices See Top of Page.

## NEW SEEDLESS PEAR

### THE PEAR WITHOUT A CORE OR SEEDS

The Pear without a fault! No seeds, no core, no waste! Solid fruit all the way through. Resembles Bartlett in appearance, but ripens 10 days later, producing its crop at a time when the market is not "glutted", thereby bringing highest prices. Thrifty grower, heavy bearer, blight resistant, grows on any soil. For Prices See Top of Page. Not available in the 7/16 to 9/16 size.

## NEW COVERT PEAR

### THE NEW LATE IMPROVED BARTLETT

Covert is one of the largest of all cultivated pears. It resembles Bartlett in shape with the same roughened surface and has about the same green color which mellows into a clear Bartlett yellow when fully mature. The fruit is two months later than Bartlett, very firm, and handles unusually well. Canning tests indicate that the canned product is equal to Bartlett and much better than Kieffer. The tree is a cropper. Covert bids fair to replace Kieffer for canning and for export. Good 2 to 3 Foot Trees, \$1.65 Each; 3 to 4 Foot Trees \$2.00 Each.

## SWEET CHERRIES

**SCHMIDT'S BIGGAREAU**—The Black Giant of Sweet Cherries. A splendid market or home use cherry, because of its attractive and all around good qualities. Considered one of the very best of the Black Sweet Cherries. Delicious to eat, fresh and canned and very attractive. Fruit grows in large clusters. Keeps well and is an excellent shipper. In size it is very large, usually unsurpassed by any black sweet cherry. Bears fruit very young, hardy and a sure cropper. We recommend this variety very highly. For prices see top of page.

**WINDSOR**—One of the best quality dark cherries, often referred to as Black Oxheart. Has pinkish flesh and almost black skin. Large, juicy and firm. Delicious to eat, fresh and wonderful for canning. Used extensively for fancy preserving. Tree grows upright and is a rapid and vigorous grower. A good variety. PRICED ABOVE.

**BLACK BING**—This black Cherry bears fruit of large size and deep color. Flesh very solid, flavor of the highest quality; tree thrifty, upright grower, very hardy and productive; a fine shipping and market variety. Also excellent for drying and home canning. May be used for locker storage after quick freezing. Always brings top prices on the market due to its large size and deep color. For prices see top of page.

**NOIR DE GUBEN**—This variety has been grown in Europe for many years, it is a reddish black cherry of good size, crops abundantly. The flesh is firm, juicy, very sweet and aromatic. It is a cherry of the Schmidt's type, a little earlier in season. The tree is vigorous, thrifty grower, healthy, and productive. It is a choicely good cherry for home and roadside trade. 2 yr. 3 to 4 ft. trees, \$1.85 each; 3 for \$4.80; 2 yr. 4 to 5 ft. \$2.15 each; 3 for \$5.85. 2 yr. 2 to 3 ft. \$1.45 each; 3 for \$3.50.

**SCHRECKEN BIGGAREAU**—It is a large heart-shaped glossy black cherry, handsome in appearance. The flesh is melting but firmer than the early-ripening sweets, moderately sweet, and full of aromatic dark-colored juice. Ripens with Black Tartarian but is much larger in size and firmer flesh makes this variety much more valuable than Tartarian. The tree is vigorous and productive. 2 yr. 4 to 5 ft. trees, \$2.15 each; 3 for \$5.85; 3 to 4 ft. \$1.85 each; 3 for \$4.80.

**NEW NOBLE**—A dark-colored firm fleshed sweet cherry for market and home use. The fruit is large, heart-shaped, slightly flattened at the apex, dark purplish red, firm fleshed, and of very high quality, and seems to crack less than those of the late sweet varieties. We recommend this variety very highly as a choice late sweet cherry. Strong 4 to 5 foot trees, \$1.50 each.

**NEW SENECA**—The New Seneca ripens 2 weeks earlier than the Black Tartarian, the standard early cherry. The cherries resemble those of Tartarian in being round-cordate, purple-black, with juicy, melting flesh, and a rich, sweet flavor. The pit is free and the skin does not crack. For Prices See Top of Page.

**NAPOLEON** (Royal Ann)—Of fine appearance and very largest size. Color yellow and amber, with bright red blush; flesh firm, juicy and delicious. Profitable for market, finding a ready sale, for canning and dessert. Ripens in July. For prices see top of page.

Very Hardy and the Best Yellow Freestone Peach We Have Ever Seen. You Make no Mistake When You Plant Halehaven.

## ELBERTA

### THE MONEY MAKER

There is no other peach which has ever attained the popularity of this variety. It is planted from the south to the north, from the east to the west, where a commercial peach is desired. It is probably too well known for any lengthy description. However, it is roundish in shape, golden yellow skin with a slightly red blush on the cheek. It is very thickly skinned, which gives it its shipping qualities. It is a freestone and a self-pollinizer. Enormous producer.

For Prices See Bottom Of Page

## REDHAVEN

Redhaven matures very early, about a month before Elberta. Fruit medium in size, of slightly elongated shape, and almost completely covered with a brilliant red color. Skin is smooth and tough. Flesh yellow, firm, fine textured, sweet, and of good quality. A perfectly fertile variety and freestone. It is safe to classify Redhaven as the outstanding early peach of tomorrow. Fruit.

## NEW FAIRHAVEN

The season of maturity of Fairhaven is about a week before Halehaven or the finish of Golden Jubilee. The original tree has produced heavy crops of fruit since 1939 at the South Haven Experimental Station, fruit buds are fully as hardy as Halehaven. Fairhaven has the same tendency for heavy fruit setting as Halehaven and Redhaven, but produces fruits of larger size than these two varieties under heavily loaded conditions, is very dependable. Fruits of Fairhaven are good size, nearly round, and mostly bright gold in color, with an attractive bright red cheek. The skin is smooth and very tough. The golden color becomes bright while the fruit is still firm. The fruits are very firm and ship exceptionally well for an early peach. The flesh is medium-yellow with a moderate amount of red color at the pit, moderately fine-textured and of good flavor. It resists browning, which is a great advantage, especially in processing. FREESTONE. For prices see bottom of page.

Hansen Apricot

## NEW HANSEN APRICOT

### THE SUPER HARDY APRICOT

Hansen's new sensational Northwest hardy apricot. Recently introduced by Prof. N. E. Hansen, of South Dakota State College, who has been working for many years to produce hardy apricots that would be good eating and large size and still would withstand the rigors of Dakota's cold and drought. Two very important points of interest stand out in regard to these new apricots. One is that they are perhaps one of the most drought resistant of all trees, coming through the terrible droughts of 1933, 1934, and 1935 with flying colors—full foliage and no apparent effect whatever from the dry, hot weather, and with a great crop of fruit. The second point is that they are hardy almost anywhere in America, standing and bearing well in climates getting as low as 50 and 60 below zero. Prices: 3 to 4 foot, \$1.15 each; 3 for \$3.00; 4 to 5 foot, \$1.65 each; 5 to 6 foot \$2.00 each.

### ORANGE QUINCE

If your temperature does not go much below zero in winter then cut fig limbs back to 10 inches high and cover remaining stubs with about 8 inches of dirt, a few leaves or straw will also help. Do this in the fall before frosts, remove protection in the spring after danger of frost is over. The fig plants grow very rapidly after protection is removed, often growing to a height of 7 feet in one season. The fruit is produced on the 1 yr. wood, almost every leaf grows 1 or 2 figs on it. Strong well rooted 2-3 ft. size, \$1.15 each; 3 for \$3.00.

# HARDY NUT TREES

## PAPER SHELLLED CARPATHIAN ENGLISH WALNUT

THESE TREES ARE GROWN FOR US IN  
NORTHERN MICHIGAN

This Hardy tree is growing in many parts of the world; the hardiest is found in Russia, Poland and Northern Carpathian mountains where the winter temperature at times drops to more than 40 degrees below zero.

It was from these countries that the original stock was brought to Canada about 20 years ago, and since then has been propagated in Michigan.

The trees have a gray colored skin, leaves are large, glossy and nicely scented. Nuts vary in size from that of the California English walnut to twice this size. Nuts fall free of hull. The shell is thin and breaks very easily. In Canada this variety is a heavy producer, grows rapidly, bears at an early age.

**HEAVY TRANSPLANTED TREES**, 1½ to 2 ft., \$2.25 each; 2 to 3 ft., \$2.85 each; 3 to 4 ft., \$3.95.

## CHINESE BLIGHT RESISTANT CHESTNUT

**GROWING YOUR OWN LARGE, SWEET CHEST-NUTS IS A PLEASURE**

A number of years ago the Chestnut blight destroyed the Native American Chestnuts. The U. S. Dept. of Agriculture—after many tests—introduced a type of Chinese Chestnut not only blight-resistant, but an early-bearer of large, good quality nuts. Trees start bearing when very young, often in 2 to 5 years, and succeed anywhere the American Sweet Chestnut formerly grew; in fact they can be grown over a wider area and may be grown wherever Peaches thrive. We recommend planting in a well-drained, sunny location. Plant the Chinese Chestnut for attractive home ground shade trees and also reap a harvest of delicious, sweet nuts.

# HARDY GIANT CULTIVATED BLUEBERRIES

Not only does the blueberry produce big juicy berries 2 to 3 times as large as common blueberries, but it is ornamental on the lawn or in the shrubbery border and very easy to grow. The foliage is dark green, long and narrow, blossoms bell-shaped and pinkish white. During the autumn the leaves turn bronze, and during the winter months the twigs are red. The bushes will grow to the height of 8 feet.

For the best results plant on acid soil. Low muck or sand soils are usually very acid. If your soil does not contain acid add a little peat moss for acidity when planting. Plant two or more plants to insure proper pollination. If your soil is not acidity, mix the soil with old sawdust or soil from the bottom of an old wood pile. Set the plant and fill the hole with the same mixture and keep the soil moist. Write to the U. S. Department of Agriculture, Washington, D. C., for Bulletin on Cultivated Blueberries. It's FREE.

# ZILKE'S NEW RED EVERBEARING RHUBARB

McDonald Rhubarb

**ZILKE'S EVERBEARING MCDONALD RED RHUBARB** is the finest of all Rhubarb. The stalks are giant in size, twice as large as ordinary Rhubarb. Bright red color. Very tender and stays tender a long time. It has the richest flavor and also more sugar, therefore requires less sweetening when cooked. It makes the finest Rhubarb pies and sauce you ever tasted. The skin is a bright red, but the inside flesh is white, so when the sauce is cooked it has just enough tinge of red to make it look appetizing. It is a tremendous yielder, that is why we call it everbearing, because as fast as you pull one stalk another comes up to take its place. You can use it over a much longer period of time than ordinary Rhubarb. The stalks are 18 to 24 inches long, many half as thick as your wrist. Nothing you can plant in your garden will give you more returns than McDonald Rhubarb. We recommend it very highly, not only because it is healthful, but because it tastes so good. Lasts a life time. Heavy 2 yr. divisions, 60¢ each; 3 for \$1.50; 10 for \$4.50.

**CANADA RED RHUBARB**—Sweet, tender and red all the way through. A brand new rhubarb imported from Canada. The stalks are dark red clear to the heart and up into the leaf. Produces large plump stalks that are very sweet, fine flavored and makes the most beautiful red sauce. Quickly grows into a large clump. A few matured plants will supply the average family. Hardy everywhere. Thrives anywhere. This is the earliest spring fruit. No. 1 divisions, 60¢ each; 3 for \$1.50; 10 for \$4.50.

New Paradise Asparagus

## New Paradise Asparagus

MATURES A YEAR EARLIER—PLANT THIS SPRING HARVEST FIRST CROP NEXT YEAR!

For this year we offer this wonderful new variety from the market gardens of California—where only the best is grown. Again we predict that within a very short time Paradise will have supplanted all other kinds, and will be the standard market and commercial variety in all sections. It is similar in appearance to Mary Washington, and was developed as a sport of that variety by an Asparagus grower in Southern California. Stems are large, same color as Mary Washington.

The opportunities for a quick profit from Paradise are now greater than ever before. With America calling for increased production of all food stuffs, canners are demanding greater and greater supplies. Paradise fully meets their requirements, being especially suitable for both canning and freezing under new process.

**GIANT LATHAM**

**BIGGEST MONEY-MAKING RASPBERRY**

The sensational yields of this variety have attracted the attention of growers everywhere, and all those who have given it a trial are praising the many unusual features they have found in Latham. After thoroughly testing Latham we find it a remarkable variety in every respect; you will be both delighted and surprised after giving it a trial.

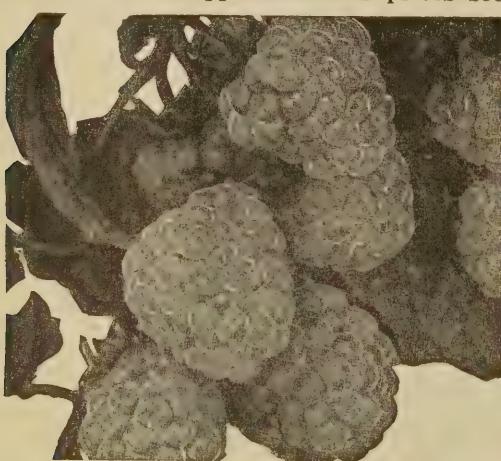

**Tremendously Productive; Large Berries.** Latham is a tall, vigorous grower, the canes are extra heavy, well able to support the load of fruit. The foliage is healthy, dark green, tough and leathery, highly resistant to insects. Covers a longer fruiting season. The berries are beauties and will cause a sensation wherever they are shown. Many are over an inch in diameter and they hold this size to the end of the season. Color is dark rich red. For prices see page 22.

**NEW DURHAM**

**NEW EARLY FALL EVERBEARING RED RASPBERRY**

The Durham Everbearing Red Raspberry is a new introduction of the University of New Hampshire, it is the earliest good fall bearer available today. The spring crop ripens about 10 days before Latham, after this crop is harvested the plants rest about two to three weeks then they start bearing again and continue until the freezing weather spoils the green berries still on the plants. **WE HIGHLY RECOMMEND THIS NEW VARIETY FOR HOME USE AND ROADSIDE STANDS.** We have fruited this variety for the past 3 years and we **HONESTLY RECOMMEND IT FOR YOUR GARDENS**, it fruits almost all summer.

Supply of plants is limited, order immediately so you will not be disappointed. For prices see page 22.

Yellow Raspberry

**INDIAN SUMMER**

**NEW EVERBEARING RED RASPBERRY**

Here is a distinctly new type of everbearer, unlike any older kind. "Marvelous" justly describes Indian Summer. The quantity, size and quality of the berries it produces in September, October and November are truly marvelous because they are so far superior to any other everbearer. With such a berry you can make worth-while profits from the high prices always paid for off-season fruit. You get a good early crop in the regular season, too.

**We Recommend This Everbearer**

Berries are uniform, rich red, thimble-shaped, large and juicy; flavor a true, tart, delicious raspberry. St. Regis berries are small and poor by comparison. A thrifty grower and heavy producer. Another N. Y. Station berry. You have never seen any fall berries as good in every way as INDIAN SUMMER.

**Be Sure To Plant This Spring**

A full-sized, heavy-bearing, fine quality, real red raspberry that bears in September, October and November. Makes money because its big fall crop of fine fruit can be depended on for high out-of-season prices. For prices see page 22.

**NEW WILLIAMEtte  
RED RASPBERRY**

The new Williamette Red raspberry is a very vigorous grower of large husky plants, has heavy foliage, which remains until late in the fall. Berries are large, long, thumb-shaped, best of flavor, very rich and sweet. **IS VERY HIGHLY RECOMMENDED FOR FREEZING PURPOSES.** Williamette has an extra long fruiting season. For prices see page 22.

**YELLOW RASPBERRY**  
**GOLDEN QUEEN RASPBERRY**

A large beautiful, golden yellow raspberry. Many prefer this variety to the red or black sorts, owing to its sugary sweetness and unsurpassed flavor. Quality of berry is excellent, canes hardy, prolific and thrifty in growth. Should be in every garden because of its beauty and high quality. For prices see page 22.

## SOMETHING NEW - NO THORNS

### GARDENIA

#### A NEW THORNLESS DEWBERRY

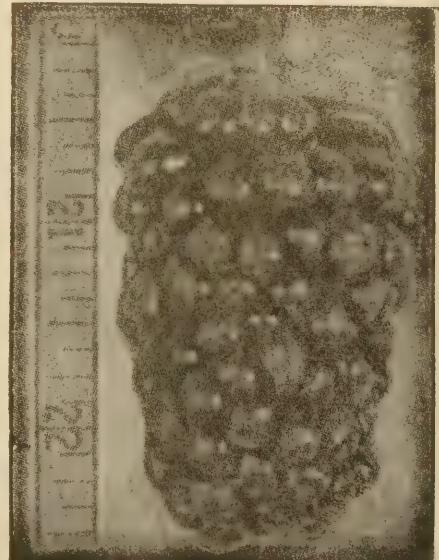

A genuine dewberry—rich, sweet and luscious in flavor as they always are—but one without thorns. What is more, Gardenia does not produce thorny shoots or plants when it grows older as some so-called thornless plants do. Very vigorous, healthy and hardy plants that have the heavy-bearing dewberry habit. Gardenia has been fully tested and is ready to win full approval in your garden. A dozen vines will make a lot of berries. 1 year No. 1 plants, 6 for \$1.25; 12 for \$2.15; 25 for \$3.75; 50 for \$6.50; 100 for \$12.00.

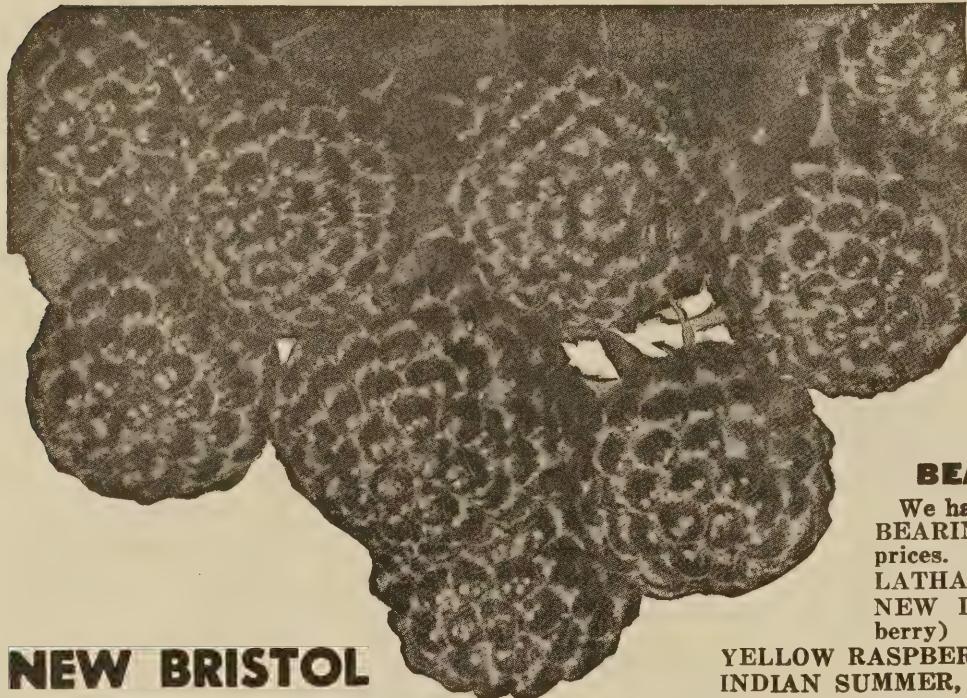

## THORNLESS BOYSENBERRY

### OFTEN BEARS FRUIT 2 TO 3 INCHES LONG

This is the extra early ripening strain of Thornless Boysenberry with canes as smooth as a grape vine. RIPENS ABOUT TWO WEEKS EARLIER THAN BOYSENBERRY. The introducer claims even heavier yields from this Thornless Boysenberry than the common Boysenberry. This new strain Thornless Boysenberry is identical to the Boysenberry except that there are no thorns and it ripens earlier. This is a good feature as the early berries bring much more money. The Thornless is as hardy, rugged and heavy bearing as its parent the Boysenberry. Vines grow long, and this pretty apple-green vine loaded with giant purple beauties is a sight you will never forget, and after you taste a handful of them, other berries will go begging for a while. Delicious with cream and sugar, and when made into jam, it's the last word. 1 year No. 1 plants, 6 for \$1.25; 12 for \$2.15; 25 for \$3.00; 50 for \$4.95; 100 for \$8.95; 250 for \$19.75.

Then at digging and grading time they are carefully inspected for root disease and final inspection when packed.

Cumberland Black Raspberry

### CUMBERLAND

#### THE BEST MIDSEASON BLACKCAP

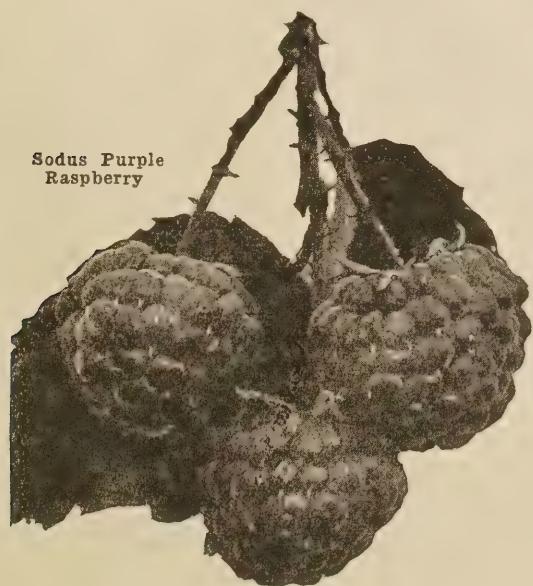

The Breadwinner of the Blackcap Family! The largest of all Blackcaps and the very best midseason kind. No Blackcap has ever been grown as extensively as Cumberland, nor attained its great popularity in all Raspberry producing sections of the country. We strongly urge all of our customers to plant this dependable old favorite instead of spending time and money on new and untried varieties in which we, ourselves, have no confidence.

Fruit is large, plump and juicy, with a true "Blackcap Flavor" all its own. Free from seediness and crumbling, with extremely firm texture, which makes Cumberland an ideal shipper. Plants are hardy, thrifty growers, producing enormous crops over a long period of time, and are especially free from anthracnose, the common disease of all Raspberries. For prices see page 22.

### PURPLE SODUS

#### BEST PURPLE RASPBERRY GROWN

This new variety is the heaviest bearing raspberry that we have ever seen. Tests have shown that it is unquestionably the best raspberry. The fruit is firm and large, many nearly an inch in diameter, a rich maroon color, with an exceptionally fine, sweet flavor. The plants are very vigorous growers, perfectly hardy, and extremely healthy. All in all, this wonderful raspberry is just what we have been looking for, for years. Fine to eat fresh and makes the best preserves and sauce you ever tasted. For prices see page 22.

Sodus Purple Raspberry

## ZILKE'S NEW 'BLACK BEAUTY' EVERBEARING BLACK RASPBERRY

You may have heard of

EVERBEARING STRAWBERRIES

OR

EVERBEARING RED RASPBERRIES

or perhaps, even,

EVERBEARING BLACKBERRIES

But have you ever heard of EVERBEARING BLACK RASPBERRIES. Well it's here now, ZILKE'S HAVE IT, and it's really a BLACK BEAUTY.

The Black Beauty Everbearing Raspberry ripens early, it starts to ripen with the well known Early Logan variety, after the summer crop is picked. Black Beauty begins producing on the tips of the new canes and side branches. Black Beauty not only has fruit on the tips of the new wood, it develops side branches, which are also helps to extend the fruiting season. Black Beauty starts with the earliest black raspberry and from there or in until fall or freezing weather it has ripe berries, green berries and blossoms all at the same time.

#### BLACK BEAUTY IS VERY HARDY

This new Black raspberry was found in the high altitude of West Virginia. Its origin at this high altitude would assure its being winter hardy and capable of thriving throughout the northern part of our country. We have fruited Black Beauty in the state of Michigan for the last four years, without winter injury to the plant or the crop.

#### BERRIES ARE GOOD IN SIZE AND QUALITY

The summer crop of berries are about the size of Cumberland, the fall or everbearing crop is larger than Cumberland or Logan. The canes are very vigorous and productive. Most of the berries are about  $\frac{1}{2}$  of an inch in diameter when ripe. The fall crop larger in size than the summer crop.

#### SUPPLY OF PLANTS IS LIMITED

As yet our supply of the Black Beauty plants is very limited, we urge you to order immediately. Orders will be booked as received and your stock will be reserved for you until you are ready for the plants. Order now before you forget, remember when plants are sold out for this season, there will be no more until next year.

FOR PRICES SEE PAGE 22

### THE EARLY LOGAN

#### MOST DEPENDABLE EXTRA EARLY

In many localities, where New Logan has been grown extensively for the past few years, it has nearly replaced all other early varieties. Ripens a week to ten days earlier than Cumberland, giving the grower a chance to market his crop ahead of the midseason rush to get the highest prices. The fruit is as large as Cumberland, very rich and sweet, with a distinctive wild flavor. Plants are hardy and very drought resistant. The perfect early variety to be grown in connection with Cumberland; thus covering the entire season. For prices see page 22.

# SAVE A FULL YEAR'S TIME

**Zilke's Plants are State Inspected, Have Ripe Berries To Sell in 3 Months**

The increased demand for good fresh fruit, such as ZILKE'S READY TO BEAR PLANTS which yield several months after planting make bearing plants scarce. Why miss out on this summer's profits when you can have fruit to sell, several months after planting? Not just a few scattered berries but enough to actually pay a small profit.

## ACTUALLY BEARING-AGE PLANTS

Zilke's bearing-age plants are not just one-year-old plants but actually TWO YEAR TRANSPLANTS. Do not be misled by some NURSERY because it actually costs money to grow plants two years instead of only one year, as in growing large one-year plants. Do not let prices alone be your buying guide, as the quality differs almost as much as night and day. Our Bearing-Age plants are fully matured plants, ready to bear a crop of fruit. They bear on the old wood several months after planting. Just think of having berries to sell that quickly. Send us your order at once because there is a shortage of Good Bearing-Age plants.

## SAVE A YEAR'S TIME AND EXPENSE

You can now start growing raspberries and get real quick action. Why wait any longer? Have nice big berries ready to sell within a few months after plants are set. Almost a full crop the second year, then years of real bumper yields and real profits. DON'T BE FOOLED WITH JUST ORDINARY PLANTS. Send us your order and have the best.

## NEW ROBINSON

### Also Known As Scarlet Beauty New Giant, Long Season Strawberry

This variety was found here in Berrien County, Michigan, several years ago and has been thoroughly tested and by this time known as the best late strawberry to grow. Robinson is a very large, round, shapely, dark red berry which topped the market last summer. Robinson is the largest berry we have ever seen, in fact we have seen 80 berries fill a quart box, the color is a cardinal red; berries have a firm tough skin, and are honey-sweet in flavor. Very good plant maker in most any kind of soil. Plant Premier and Robinson and you will have berries over the entire season. Robinson starts fruiting soon after Premier and continues through the late berry season, matchless in beauty, flavor and quality. Price: 25 plants \$0.90; 50 for \$1.60; 100 for \$2.65; 250 for \$5.75; 500 for \$8.50; 1000 for \$15.00. For larger amounts ask for special prices.

## CATSKILL

### THE STANDARD LATE VARIETY

It is now generally recognized as one of the best of the midseason to late varieties. This popularity is due to the fact that it will produce more quarts of large berries than any other variety. It is a sure cropper, as it ranks next to Premier in this respect. It rarely ever freezes. Catskill is bright shiny red, the berries hold their color very well, and when they are carefully packed they present a very attractive appearance. The foliage of the plant is rich, waxy in appearance, and the fruit is produced on long picking stems. It ripens when the market is almost bare of fruit, and for this reason always commands a good price.

# The "Miracle Plant Food" Ra-Pid-Gro

A complete, quickly available, easily prepared plant food by merely adding one pound of RA-PID-GRO to 22 gallons of water

## WHAT IS A RA-PID-GRO?

RA-PID-GRO is a complete concentrated plant food formula. Easily made into an immediately effective liquid fertilizer by simply adding water. It will speed up growth of plants now in place and will assure more successful transplanting of new plants.

## HOW IS IT USED?

RA-PID-GRO is so easily prepared for use. Just add water at the rate of 1 lb. of RA-PID-GRO to 22 gallons of water. Allow to dissolve and it's ready for use. Apply around each plant according to directions on the bag. For use on small numbers of plants mix at the rate of a teaspoonful to the quart of water. Also very valuable for use when transplanting. Dip plants in solution for 3 or 4 minutes, then set in place and water with remainder of liquid. Practically eliminates losses.

## WHAT WILL IT DO?

RA-PID-GRO will work almost unbelievable miracles in promoting rapid and healthy growth on all types of plants. Use it on lawns, around shade trees, evergreens, shrubs, roses, perennials, vegetables and house plants. Many times plants which have been given up for dead will respond to applications of RA-PID-GRO. All the vital plant food elements are present in this remarkable discovery and since it is applied in liquid form, are readily available to the roots of the plant.

## HOW DOES ITS COST COMPARE WITH OTHER FERTILIZERS?

RA-PID-GRO is less expensive than other fertilizers. In the larger quantities it makes your fertilizer cost about  $\frac{1}{2}$  cent per pound as against a cost of about 3 cents per pound for average fertilizers. Remember, 1 pound of RA-PID-GRO makes 176 pounds of rich and complete plant food.
